Digital Microscopy Now Available from LECO

St. Joseph, MI—LECO has partnered with HIROX, the leader in digital microscopy, to bring you a new line of microscope solutions for your North American laboratory. HIROX digital zoom microscope systems have the highest magnification (up to 7000X) currently available on the market ideal for capturing, recording, and measuring a variety of materials, and then viewing these images in outstanding detail. Available packages offer a variety of lenses with a HIROX interface, integrating a CCD digital camera and fiber optic illumination into one system. The LDC 7700 offers standard 3D software for total sample reconstruction, along with an integrated computer and monitor for portability. The LDC 1300 is available with optional 3D software and image analysis/management software. Visit www.leco.com for more information or to schedule a demonstration.
